## SUMMARY

Proactive web developer with 6+ years of experience, specializing in crafting user-friendly, high-performing web solutions customized to client needs. I am a proficient developer specializing in **JavaScript**, **React.js, and Java**. Passionate about **software development, problem-solving**, **QA** (Quality Assurance) and Continuous Learning. In my prior role as a Team Lead Web Developer at a premier web design company, I delivered high-quality software solutions tailored to meet clients' unique needs, enhancing not only my technical skills but also my ability to collaborate effectively within diverse teams.

---

## RELATED WORK EXPERIENCE

**Strayer University**                                                      Jul 2023 - Present
### Web Development Instructor

- Expertise in JavaScript, **HTML**, **CSS**, **Node.js**, and **Web Development Frameworks**, coupled with a strong foundation in **Back-End Programming**, **Databases**, and **API** integration.
- Skilled in utilizing **GitHub** for version control, navigating the **command line** interface, and employing **testing** and **debugging** strategies to ensure code quality.
- Deliver compelling lectures, practical demonstrations, and hands-on coding exercises to effectively communicate complex web development concepts.
- Facilitate dynamic discussions, group activities, and collaborative coding sessions to create an interactive and immersive learning environment.
- Proven ability to provide constructive feedback on student work, supporting their learning and growth, while staying current with industry trends and technology advancements.

**Website Blue**                                                           Oct 2020 - Jan 2023
### Team Lead Web Developer

- Led and coordinated a dynamic team of developers and designers to ensure collaborative and efficient project execution.
- Collaborated with clients to understand their requirements, goals, and objectives, and developed customized website solutions aligned with their vision.
- Designed visually appealing and user-friendly templates that are optimized for various sizes, using programming languages such as React.js JavaScript**,** HTML and CSS for Real Estate companies.
- Developed interactive brochures and email templates that engage customers and drive conversions, using graphic design, user experience design, using **Figma, Adobe XD, Photoshop** and **Adobe Illustrator**.
- Demonstrated a commitment to excellence and attention to detail in every project, ensuring that client expectations are exceeded.

**Amir Net Co**                                                            Mar 2014 - May 2017
### Android Developer

- Developing the Rahnama GB Android application (Farsi Yellow page)
- Write clean, efficient, and maintainable Android Native Java code that conforms to Android coding standards and best practices.
- **Troubleshoot**, **debug** and **test** new features with Android applications and provide timely resolutions.
- Ensuring optimal performance, responsiveness, and user experience.

# EDUCATION

**General Assembly**                                            May 2020 - Aug 2020
**Software Engineer Immersive**

- Experience in creating projects using React.js, Vue.js and JavaScript.
- Worked with SQL, Node.js and Firebase as back-end technologies.
- Creating responsive websites using web development frameworks.
- Developing websites with top-tier HTML and CSS programming skills.

**Central Queensland University**                               Jul 2017 - Jul 2019
**Master's of Information Technology**

- Created a mobile application that integrated with a wearable fitness tracker to track users' physical activity and provide personalized fitness recommendations.
- Presented research on the impact of mobile technology on healthcare at a university symposium on technology and innovation.
- Received an award for outstanding performance in mobile development coursework, based on grades, project quality, and participation in class discussions.
- Collaborated with a fellow student in a university hackathon to create a mobile application that provided users with product reviews and ratings based on barcode scans.
- Achieved an A+ (High Distinction) in core courses.

**Azad University**                                             2006 - Sep2011
**Bachelor of Software engineering**

- Led a team of peers in the development of a software project that won first place in a university hackathon competition.
- Worked as a software engineering intern at a major technology company, where I contributed to the development of a new software product.
